BUSINESS MODEL CANVAS

Applied Intuition

Vehicle software, simulation and autonomy for cars, trucks, mining, construction, agriculture and defense

VALUATION	ARR END-2024	ENGINEERS	REACH
$15B (Jun 2025)[18]	**~$400M (reported)**[34]	**1,000+**[17]	**18 of top 20 non-Chinese carmakers**[19]

1 KEY PARTNERS

- NVIDIA: compute and AI models[1]
- Co-developing carmakers (Porsche, Honda, Nissan, TRATON)[2,3,4,5]
- Defense primes (HII, AeroVironment)[6,7]
- LG Innotek (sensors) and OpenAI (in-car AI)[8,9]
- ◇ HUMAIN: Saudi AI partner for autonomous trucking[10] FUTURE BET

2 KEY ACTIVITIES

- Build 30+ software products[11]
- Run simulation and data engines at scale (50M+ runs)[12]
- Test autonomy on real trucks and vehicles[12,13]
- Co-develop with OEM engineering teams[3,4]
- Acquire technology and teams (CarSim, Embark, EpiSci…)[14,15,16]

3 KEY RESOURCES

- 1,000+ engineers (~83% of staff)[11,17]
- Venture funding: $600M Series F incl. tender offer (2025)[18]
- Acquired IP and driving data[14,15]
- Blue-chip customer references[19]
- Offices in the US, Germany, Japan, Korea, Saudi Arabia[10,19]

4 VALUE PROPOSITIONS

- Shorter vehicle-software development and validation cycles[4,5,20]
- Less physical testing; rare scenarios tested safely at scale[2,5,21]
- OEM keeps control of its software architecture[2,3,22]
- Modular: buy only the parts you need[11]
- ○ Faster path to autonomy with a ready-made stack (cars, trucks, mining)[1,13,23] GROWTH
- ○ Autonomy for defense platforms, incl. legacy vehicles and jammed environments[12,24] GROWTH

5 CUSTOMER RELATIONSHIPS

- Engineers embedded with customer teams[3,4,25]
- Multi-year strategic partnerships (Komatsu, TRATON, Isuzu)[5,13,23]
- Defense: prototype → production programs[26,27]
- Customization and integration support (reported)[28]

6 CHANNELS

- Direct enterprise sales (6–18 month cycles, reported)[29]
- Land with one tool, expand to more (reported)[4,29]
- Government procurement (DIU, CDAO, Navy)[26,27,30]
- Ecosystem partners and public partnership announcements[1,3,31]

7 CUSTOMER SEGMENTS

- Global carmakers (Toyota, Honda, Nissan, Stellantis…)[3,4,31,32]
- Truck makers (TRATON, Isuzu)[5,13]
- Off-road: mining (Komatsu); construction and agriculture targeted[18,23]
- ○ US military and allies[26,27] GROWTH
- Autonomy start-ups (original base)[11]

8 COST STRUCTURE

- Engineering payroll: largest cost (analyst view)[11]
- Test fleets and vehicle operations[8,12,13]
- Compute and cloud for simulation and training (analyst view)[12]
- Global offices (six opened or expanded in 2025)[12]

9 REVENUE STREAMS

- Software licenses by seats, workload and modules (reported)[29]
- ○ Government contracts: CDAO ceiling up to $171M; Navy award $25M[26,33] GROWTH
- ○ Vehicle OS and autonomy licensing (terms not disclosed)[3,11] GROWTH
- Integration and customization services (reported)[28]

REVENUE
~$400M ARR (end-2024) is press-reported, not company-disclosed. ~$830M (2025) is a Sacra estimate.[34,35]

UNIT ECONOMICS
Gross margin estimated at 80–85% (Sacra estimate). Contract ceilings are not recognized revenue.[26,35]

PIPELINE
HUMAIN aims for thousands of autonomous trucks by 2030. Isuzu targets an L4 truck launch by FY2028.[10,13]

● Current core ○ Growth ◇ Future bet
